

UNIVERSITY STUDENT SUPPORT UPDATE / TASC

I- INTRODUCTION/CONTEXT

Receiving this scholarship support is very important for the 10 beneficiary students. They all come from vulnerable families in the Ambalavao district. Without this project support they could never have continued their university studies and would not be able to realize their dream in the future. They know that studying at university is not easy. All of them have problems with French and computing. During the COVID-19 crisis, some of them did studies on-line.
